- Public transit workers
- U.S. Postal Service workers

Other Essential Workers & High-risk Medical Conditions³

- People aged 16-64 years with medical conditions that increase the risk for severe COVID-19
- Essential workers not included in previous groups

General Public³

- Vaccine available to the general public 16 years of age and older
- ACIP will consider recommendations for children ≤ 15 years of age when a COVID-19 vaccine is authorized for use in that age group

December 2020

January – February 2021

March – April 2021

May 2021

Estimated timeframes to begin vaccinating groups

1. Idaho Governor Brad Little convened the Idaho COVID-19 Vaccine Advisory Committee (CVAC) to advise him on and assist state and local entities with the prioritization of vaccines when they are in limited supply, guide planning efforts and broadly communicate messaging to ensure equitable access to COVID-19 vaccines across the state. The goals and principles of the group are as follows: reduce transmission, severe illness and death [from the virus that causes COVID-19]; preserve functioning of the healthcare system; recover functioning of society and the economy; protect persons at risk who have access and functional needs; ensure equitable distribution within groups prioritized for vaccination phases and equity in the opportunity for health and well-being; ensure transparency regarding vaccine decision-making.
2. CVAC and Governor Little approved subprioritization. For more information please see: coronavirus.idaho.gov/covid-19-vaccine/
3. [ACIP Recommendation](#) as of 12/22/2020. CVAC has not yet voted on this subgroup.
